Stealth Pro - Location of model number and wattage

Marineland Stealth and Stealth Pro Aquarium Heaters Recalled

Hazard: A wiring problem can cause the aquarium heaters to overheat or break during normal use, damaging the aquarium and posing fire and laceration hazards to consumers. Overheating or a break can cause the heater to shatter or the aquarium glass to break.

United Pet Group has received 2 reports of broken aquarium glass in Canada.

This recall involves the following Marineland Stealth and Stealth Pro aquarium heaters. The heaters are black plastic tubes and have a temperature adjustment knob at the top. The model name "Stealth" (in white letters) or "Stealth Pro" (in red letters) is printed on the side of the heater. The model number and the wattage rating are printed below the model name. Stealth Pro heaters were also sold as part of aquarium starter kits.

Marineland Stealth Models

Wattage	Model Number
25W	ETP25
50W	ETP50
75W	ETP75
100W	ETP100
